### CHAPTER 1

#### Mind Control — Internal or External?

- 1 1.0 Chapter Overview
- 2 1.1 Our Special Intelligence
- 3 1.2 Rodents that Engineer Wetlands
  - 1.2.1 *Castor canadensis*
  - 1.2.2 The Cognitive Beaver?
- 5 1.3 The Instincts of Insects
  - 1.3.1 The Instinctive Wasp
  - 1.3.2 *Umwelt* and Control
- 7 1.4 Paper Wasp Colonies and Their Nests
  - 1.4.1 Colonies and Their Nests
  - 1.4.2 Scaling Up
- 8 1.5 The Towers of Termites
  - 1.5.1 Termite Mounds
  - 1.5.2 The Thinking Termite?
- 10 1.6 The Rational Insect?
  - 1.6.1 Computational Theory of Mind
  - 1.6.2 Are Insects Representational?
- 11 1.7 Insect as Superorganism?
  - 1.7.1 The Intelligent Whole
  - 1.7.2 Colonial Intelligence
- 13 1.8 The Ultimate Democracy
  - 1.8.1 Emerging Problems
  - 1.8.2 From Whence Organization?
- 14 1.9 Programs for Nest Construction
  - 1.9.1 An Inherited Program
  - 1.9.2 Testing the Theory
- 16 1.10 The Environment as Program
  - 1.10.1 A Complex Environment
  - 1.10.2 Stigmergy
- 17 1.11 Stigmergy and the Synthetic Approach
  - 1.11.1 The Synthetic Approach
  - 1.11.2 Wasp Nest Examples
- 19 1.12 Stigmergy and the Parable of the Ant
  - 1.12.1 Intelligence and Stigmergy
  - 1.12.2 Are Mammals Stigmergic?
- 20 1.13 Embodiment and Posthumanism
  - 1.13.1 Posthumanism
  - 1.13.2 Embodiment
- 22 1.14 Stigmergy and Classical Cognition
  - 1.14.1 Classical Control
  - 1.14.2 Externalizing Control

# Contents

**CHAPTER 2****Classical Music and the Classical Mind**

- 25 **2.0** Chapter Overview
  - 26 **2.1** The Boolean Dream
    - 2.1.1 Cognitive Science
    - 2.1.2 Logicism
    - 2.1.3 The Boolean Dream
  - 28 **2.2** Classical Cognitive Science
    - 2.2.1 A Classical Device
    - 2.2.2 Three Key Characteristics
  - 29 **2.3** Classical Views of Mind and Music
    - 2.3.1 Mind and Music
    - 2.3.2 A Classical Analogy
  - 31 **2.4** Musical Logicism
    - 2.4.1 Musical Formalisms
    - 2.4.2 Sonata-Allegro Form
  - 32 **2.5** A Harmonious Narrative
    - 2.5.1 Representational Explanation
    - 2.5.2 Musical Expressions
  - 34 **2.6** The Nature of Classical Composition
    - 2.6.1 The Disembodied Mind
    - 2.6.2 The Thoughtful Composer
  - 35 **2.7** Central Control of a Classical Performance
    - 2.7.1 Central Control
    - 2.7.2 Conductor as Central Controller
    - 2.7.3 The Controlling Score
  - 37 **2.8** Disembodiment and the Classical Audience
    - 2.8.1 Disembodiment
    - 2.8.2 Audience and Composition
  - 38 **2.9** Classical Reactions
    - 2.9.1 Reacting to Music
    - 2.9.2 Classical Competitors
  - 40 **2.10** Modern Music
    - 2.10.1 Out with the Old
    - 2.10.2 In with the New
  - 41 **2.11** Dodecaphony
    - 2.11.1 Tonality and Atonality
    - 2.11.2 The Twelve-Tone Method
  - 43 **2.12** Reactions to Atonal Structure
    - 2.12.1 From Structure to Structure
    - 2.12.2 Reducing Central Control
  - 45 **2.13** Control and Emergence in Cage's Music
    - 2.13.1 Silence
    - 2.13.2 Chance and Emergence
  - 46 **2.14** Emergence in Minimalist Music
    - 2.14.1 Tape as Medium
    - 2.14.2 *It's Gonna Rain*
-

- 48 **2.15** A Minimalist Score
  - 2.15.1 *In C*
  - 2.15.2 Minimalism and Stigmergy
- 49 **2.16** Musical Stigmergy
  - 2.16.1 Musical Swarms
  - 2.16.2 The ReactTable
- 51 **2.17** From Hot to Cool
  - 2.17.1 The Conduit Metaphor
  - 2.17.2 Audible Processes
- 52 **2.18** The Shock of the New
  - 2.18.1 Classical Value
  - 2.18.2 A Tradition of Improvisation
- 54 **2.19** Musical Methods and the Mind
  - 2.19.1 Characteristic Questions
  - 2.19.2 The Synthetic Approach

57

## **CHAPTER 3** **Situated Cognition and *Bricolage***

- 57 **3.0** Chapter Overview
- 58 **3.1** Three Topics to Consider
  - 3.1.1 Review to This Point
  - 3.1.2 New Headings
- 59 **3.2** Production Systems as Classical Architectures
  - 3.2.1 The Production System
  - 3.2.2 Classical Characteristics
- 61 **3.3** Sense–Think–Act with Productions
  - 3.3.1 An Early Production System
  - 3.3.2 The Next ACT
- 63 **3.4** Logic from Action
  - 3.4.1 Productions and Logicism
  - 3.4.2 Logic as Internalized Action
- 65 **3.5** An EPIC Evolution
  - 3.5.1 Productions, Sensing, and Action
  - 3.5.2 The EPIC Architecture
- 66 **3.6** Productions and Formal Operations
  - 3.6.1 Sense–Think–Act
  - 3.6.2 Formal Operations
- 68 **3.7** Evidence for Sensing and Acting Without Thinking
  - 3.7.1 Classical Modularity
  - 3.7.2 Visuomotor Modules
- 69 **3.8** Action without Representation?
  - 3.8.1 Multiple Visual Pathways
  - 3.8.2 Blindsight
- 71 **3.9** A Need for Action
  - 3.9.1 Incorporating Action
  - 3.9.2 Advantages of Action

- 72 **3.10** The External World and Computation
  - 3.10.1 Worldly Support for Cognition
  - 3.10.2 Scaffolding
- 74 **3.11** Some Implications of Scaffolding
  - 3.11.1 The Leaky Mind
  - 3.11.2 Group Cognition
  - 3.11.3 Specialized Cognition
- 76 **3.12** Stigmergy of Thought
  - 3.12.1 Environmental Import
- 77 **3.13** *Bricolage*
  - 3.13.1 Resource Allocation
  - 3.13.2 Thought as *Bricolage*
- 79 **3.14** The Power of *Bricolage*
  - 3.14.1 *The Savage Mind*
  - 3.14.2 Power from Non-linearity
- 80 **3.15** The Society of Mind
  - 3.15.1 Agents and Agencies
  - 3.15.2 Explaining Mental Societies
- 82 **3.16** Engineering a Society of Mind
  - 3.16.1 Reverse Engineering
  - 3.16.2 Forward Engineering
- 83 **3.17** Synthesis in Action
  - 3.17.1 Cricket Phonotaxis
  - 3.17.2 Robot Phonotaxis
- 85 **3.18** *Verum-Factum*
  - 3.18.1 Synthetic Psychology
  - 3.18.2 Vico's Philosophy
- 87 **3.19** Mind and Method
  - 3.19.1 Mind
  - 3.19.2 Method
- 88 **3.20** Synthesis as Process, Not as Design
  - 3.20.1 Synthesis Is Not Design
  - 3.20.2 Synthesis as Process
- 90 **3.21** Building *Bricoleurs*
  - 3.21.1 Cartesian Alternatives
  - 3.21.2 Students as *Bricoleurs*

## CHAPTER 4

### Braitenberg's Vehicle 2

- 93 **4.0** Chapter Overview
- 94 **4.1** A Robot's Parable
  - 4.1.1 Path of a Robot
  - 4.1.2 Analysis and Synthesis
- 95 **4.2** Braitenberg's Thought Experiments
  - 4.2.1 A Thought Experiment
  - 4.2.2 Goals

97	<b>4.3 Foraging for Parts</b>
	4.3.1 Parts and Foraging
	4.3.2 Robot <i>Bricolage</i>
98	<b>4.4 Chassis Design (Steps 1 through 4)</b>
	4.4.1 General Design
	4.4.2 Initial Chassis Construction
99	<b>4.5 Constructing the Chassis (Steps 5 through 7)</b>
	4.5.1 General Design
99	<b>4.6 The NXT Interactive Servo Motor</b>
	4.6.1 The Evolution of LEGO Motors
	4.6.2 The NXT Servo Motor
100	<b>4.7 Adding Motors to the Chassis (Steps 8 and 9)</b>
101	<b>4.8 Adding a Front Slider (Step 10)</b>
	4.8.1 Passive Front Support
	4.8.2 Constructing the Front Slider
102	<b>4.9 Constructing Rear Axles (Step 11)</b>
	4.9.1 Wheel Axle Design
	4.9.2 Constructing the Wheel Axles
103	<b>4.10 Attaching the NXT Brick (Step 12)</b>
	4.10.1 The NXT Brick
	4.10.2 Attaching the Brick
103	<b>4.11 Attaching Light Sensor Supports (Step 13)</b>
	4.11.1 Sensor Mount Design
104	<b>4.12 Adding Light Sensors (Step 14)</b>
	4.12.1 Mounting Light Sensors
105	<b>4.13 Wheels and Cable Considerations</b>
	4.13.1 Completing the Robot
106	<b>4.14 Sensing, Acting, and the NXT Brick</b>
	4.14.1 The NXT Brick
107	<b>4.15 NXT Light Sensor Properties</b>
	4.15.1 The LEGO Light Sensor
109	<b>4.16 Programming the NXT Brick</b>
	4.16.1 Programming Steps
	4.16.2 Programming Environment
110	<b>4.17 A Simple Main Task</b>
	4.17.1 The Main Task
	4.17.2 Defining Variable Names
	4.17.3 Miscellaneous Syntax
111	<b>4.18 Linking Light Sensors to Motors</b>
	4.18.1 Two More Tasks
112	<b>4.19 A Complete Program</b>
114	<b>4.20 Exploring Vehicle 2 Behaviour</b>
	4.20.1 Three Test Environments
	4.20.2 A Simple World
	4.20.3 A More Complex World
	4.20.4 Complexities via Embodiment

---

- 115 4.21 Further Avenues for *Bricoleurs*
  - 4.21.1 Exploring Embodiment
  - 4.21.2 Manipulating Environments
  - 4.21.3 Modifying Code
  - 4.21.4 *Bricolage*, Not Design

117

## CHAPTER 5 Thoughtless Walkers

- 117 5.0 Chapter Overview
  - 118 5.1 Analysis vs. Synthesis
    - 5.1.1 Synthetic Methodology
    - 5.1.2 Analytic Methodology
    - 5.1.3 Complementary Methodologies
  - 119 5.2 Biomimetics and Analysis
    - 5.2.1 Natural Technology
    - 5.2.2 Early Analysis of Locomotion
  - 121 5.3 From Motion Analysis to Walking Robots
    - 5.3.1 Modern Motion Analysis
    - 5.3.2 Biologically Inspired Robots
  - 122 5.4 Analysis That Constrains Synthesis
    - 5.4.1 Passive Dynamic Walking
    - 5.4.2 Search and Construct
  - 124 5.5 A LEGO Passive Dynamic Walker
    - 5.5.1 Synthesis after Analysis
    - 5.5.2 Parts and Foraging
  - 125 5.6 Building a Straight-Legged Hinge
    - 5.6.1 Centre Post
    - 5.6.2 Support Legs
  - 126 5.7 Weighting the Walker
    - 5.7.1 The Need for Weights
    - 5.7.2 LEGO Weights
  - 127 5.8 A Specialized Environment
    - 5.8.1 The Need for Holes
    - 5.8.2 Building a Ramp with Gaps
  - 128 5.9 Raising the Ramp
    - 5.9.1 Reinforced Ends
    - 5.9.2 Elevating the Platform
  - 129 5.10 From Talking the Talk to Walking the Walk
    - 5.10.1 Passive Dynamic Walking
    - 5.10.2 Implications
  - 131 5.11 Synthesis in Aid of Analysis
    - 5.11.1 The Opposite Direction
    - 5.11.2 Analytic Intractability
  - 132 5.12 Ashby's Homeostat
    - 5.12.1 Homeostat Design
    - 5.12.2 Behaviour of the Homeostat
-

- 134 **5.13 The Great Pretender**
    - 5.13.1 Synthesis and Scaling Up
    - 5.13.2 Strandbeest
  - 135 **5.14 A LEGO Strandbeest**
    - 5.14.1 Alternative Material
  - 136 **5.15 Segmented Design**
    - 5.15.1 Parts and Foraging
  - 137 **5.16 From the Ground Up**
    - 5.16.1 Ankles and Feet
    - 5.16.2 Feet vs. Wheels
  - 138 **5.17 A Strandbeest Leg**
    - 5.17.1 Precise Proportions
  - 139 **5.18 LEGO Legs and Holy Numbers**
    - 5.18.1 Completing a Leg
    - 5.18.2 The Holy Numbers
  - 140 **5.19 Reinventing the Wheel**
    - 5.19.1 Pairing Legs into a Module
  - 141 **5.20 Quadruped**
    - 5.20.1 Mounting the Modules
    - 5.20.2 Gait Exploration
  - 143 **5.21 Manipulating Quadruped Gaits**
    - 5.21.1 Quadruped Gaits
    - 5.21.2 Exploring Strandbeest Gaits
  - 144 **5.22 An Octapedal Strandbeest**
    - 5.22.1 Additional Legs
    - 5.22.2 Walking with Eight Legs
  - 146 **5.23 Strandbeests in Action**
    - 5.23.1 Observing Strandbeest Gaits
    - 5.23.2 Exploiting Stronger Situation
  - 147 **5.24 Alternative Gaits and Robotic Snakes**
    - 5.24.1 Snake-like Movement
    - 5.24.2 Analyzing Snake Locomotion
  - 149 **5.25 The Wormeostat: A Synthetic Snake or Worm**
    - 5.25.1 Feedback and Motion
    - 5.25.2 Motion from Friction
  - 150 **5.26 Foraging For Wormeostat Parts**
    - 5.26.1 Building the Wormeostat
    - 5.26.2 Parts and Modules
  - 151 **5.27 Motor and Tire Assemblies**
    - 5.27.1 Motor Modules
    - 5.27.2 Tire Assemblies
  - 151 **5.28 Preparing Two NXT Bricks**
    - 5.28.1 Control and Friction
  - 152 **5.29 Front End Friction**
    - 5.29.1 Motor Friction
    - 5.29.2 Brick Friction
  - 153 **5.30 A Second Front End Motor**
    - 5.30.1 Reflected Construction
-

- 153 **5.31** Completing the Front Half
  - 5.31.1 Connecting Three Components
- 154 **5.32** Modules for the Rear Half
  - 5.32.1 Replicating Components
- 154 **5.33** Completing the Rear Half
  - 5.33.1 A Second Chain
- 154 **5.34** The Total Wormeostat
  - 5.34.1 Linking the Halves
  - 5.34.2 Programming Feedback
- 155 **5.35** Wormeostat Code for Motor 1
  - 5.35.1 Motor Behaviour
- 157 **5.36** Wormeostat Code for Motor 2
  - 5.36.1 Second Verse Same as First
- 158 **5.37** Wormeostat Main Task
  - 5.37.1 The Main Task
  - 5.37.2 Modular Duplication
- 159 **5.38** The Wormeostat's Behaviour
  - 5.38.1 Fireside Dogs
  - 5.38.2 Wormeostat Movement
- 160 **5.39** Implications
  - 5.39.1 Two Cultures
  - 5.39.2 Mending the Rift

163

## **CHAPTER 6**

### ***Machina Speculatrix***

- 163 **6.0** Chapter Overview
- 164 **6.1** William Grey Walter
  - 6.1.1 Biographical Highlights
  - 6.1.2 A Very Public Robot
- 165 **6.2** The Tortoise
  - 6.2.1 Appearance
  - 6.2.2 Behaviour
- 167 **6.3** Speculation and Positive Tropisms
  - 6.3.1 Exploration as Speculation
  - 6.3.2 Phototropism
  - 6.3.3 Inferring Internal Mechanisms
- 168 **6.4** Not All Lights Are the Same
  - 6.4.1 A Negative Phototropism
  - 6.4.2 Analysis of Behaviour
- 170 **6.5** Choice
  - 6.5.1 Buridan's Ass
  - 6.5.2 Complicating the Environment
- 171 **6.6** Additional Negative Tropisms
  - 6.6.1 Avoiding Obstacles
  - 6.6.2 Avoiding Slopes

- 173 **6.7 Dynamic Tropisms**
    - 6.7.1 Toys vs. Tools
    - 6.7.2 Changing Light Sensitivity
  - 174 **6.8 Self-Recognition**
    - 6.8.1 Self, Not Machine
    - 6.8.2 The Mirror Dance
  - 175 **6.9 Mutual Recognition**
    - 6.9.1 The Relative World
    - 6.9.2 Social Environments
  - 176 **6.10 Internal Stability**
    - 6.10.1 Feedback and Cybernetics
    - 6.10.2 Cybernetics and Simulation
  - 178 **6.11 Parsimony**
    - 6.11.1 Two Approaches to Stability
    - 6.11.2 A Simple Machine
  - 180 **6.12 A LEGO Tortoise**
    - 6.12.1 A New Generation
    - 6.12.2 Variations of Design
  - 181 **6.13 Parts for a Modular Design**
    - 6.13.1 Sophistication from Tweaking
  - 182 **6.14 The “Spine” of the Chassis**
    - 6.14.1 Building a Spine
  - 182 **6.15 Mirrored Motor Assemblies**
    - 6.15.1 Two Motor Assemblies
  - 183 **6.16 Attaching Motors to the Chassis**
    - 6.16.1 Motors and Steering Gear
  - 184 **6.17 A Small Stick for Big Obstacles**
    - 6.17.1 Stick-In-Ring Detector
  - 184 **6.18 Adding a Drive Gear and Stick-In-Ring Switch**
    - 6.18.1 Front Wheel Drive
    - 6.18.2 Stick In the Stick-In-Ring
  - 185 **6.19 A Vertical Front Axle**
    - 6.19.1 Front Axle Gears
  - 185 **6.20 Preparing the NXT Brick**
    - 6.20.1 Readying the Brick
    - 6.20.2 Stick-In-Ring Detector
  - 186 **6.21 Supporting Rear Wheels**
    - 6.21.1 Rear Wheel Supports
    - 6.21.2 Brick and Wheel Attachment
  - 188 **6.22 Front Wheel Assembly and Attachment**
    - 6.22.1 Front Wheel Gear Gang
  - 189 **6.23 Pilot Light Assembly**
    - 6.23.1 A LEGO Pilot Light
  - 190 **6.24 Attaching Pilot Lights and Connecting Wires**
    - 6.24.1 Pilot Light Wiring
  - 192 **6.25 A Periscope Mirror**
    - 6.25.1 A 360° Rotating Mirror
-

- 193 **6.26 Sensing Light from the Periscope**
  - 6.26.1 Attaching the Periscope
  - 6.26.2 Sensing Periscope Light
- 194 **6.27 Adding More Cables**
  - 6.27.1 Periscope Wiring
  - 6.27.2 Motor Wiring
- 194 **6.28 A Surrounding Shell**
  - 6.28.1 Shell Design
- 196 **6.29 Suspending the Shell**
  - 6.29.1 The Suspension System
- 197 **6.30 Completing the Tortoise**
  - 6.30.1 Attaching the Shell
  - 6.30.2 Next: Tortoise Programming
  - 6.30.3 Embodiment Issues

199

## **CHAPTER 7**

### **The Subsumption Architecture**

- 199 **7.0 Chapter Overview**
- 200 **7.1 A Sandwich of Vertical Modules**
  - 7.1.1 Cognitivism
  - 7.1.2 The Classical Sandwich
- 201 **7.2 The New Look and Its Problems**
  - 7.2.1 The New Look in Perception
  - 7.2.2 Shakey Implications
- 203 **7.3 Horizontal Layers in the Human Brain**
  - 7.3.1 Evidence from Action
  - 7.3.2 Sandwich Alternative
- 205 **7.4 Horizontal Links between Sense and Action**
  - 7.4.1 A Sandwich Alternative
- 206 **7.5 The Subsumption Architecture**
  - 7.5.1 Modularity of Mind
  - 7.5.2 Vertical Modules
- 208 **7.6 Advantages of the Subsumption Architecture**
  - 7.6.1 Reasons for Revolution
  - 7.6.2 Coping with Multiple Goals
  - 7.6.3 Combining Multiple Sensors
  - 7.6.4 Robustness
  - 7.6.5 Speed with No Modeling
- 209 **7.7 Concrete Examples**
  - 7.7.1 Walking Robots
  - 7.7.2 The Tortoise
- 211 **7.8 Level 0, Basic Movement**
  - 7.8.1 A Fundamental Function
- 212 **7.9 Level 1, Steering**
  - 7.9.1 Exploration
- 212 **7.10 Level 2, Sensing Ambient Light**
  - 7.10.1 Light Affects Lower Levels

- 214 **7.11** Level 3, Obstacle Avoidance
  - 7.11.1 Sophistication from Tweaking
- 215 **7.12** The Main Task
  - 7.12.1 Modular Design
- 216 **7.13** Observing Tortoise Behaviour
  - 7.13.1 Level 0
  - 7.13.2 Level 0 + Level 1
  - 7.13.3 Level 0 + Level 1 + Level 2
  - 7.13.4 All Four Levels
- 218 **7.14** The Total Tortoise
  - 7.14.1 Repeating History
  - 7.14.2 Search for an Optimum
  - 7.14.3 Free Will
  - 7.14.4 Discernment
  - 7.14.5 Self-Recognition
- 220 **7.15** Tortoise Implications
  - 7.15.1 Grey Walter's Legacy
  - 7.15.2 The LEGO Tortoise
  - 7.15.3 Degrees of Embodiment

223

## CHAPTER 8

### Embodiment, Stigmergy, and Swarm Intelligence

- 223 **8.0** Chapter Overview
- 224 **8.1** Travelling Salesmen
  - 8.1.1 The Traveling Salesman Problem
  - 8.1.2 Solving the TSP
- 226 **8.2** Swarm Intelligence
  - 8.2.1 Economical Ants
  - 8.2.2 Emergent Intelligence
- 227 **8.3** Collective Contributions
  - 8.3.1 Swarm Advantages
  - 8.3.2 Robot Collectives
- 228 **8.4** Critical Numbers of Agents
  - 8.4.1 When Is a Swarm Intelligent?
  - 8.4.2 A Foraging Example
- 230 **8.5** Coordination, Communication, and Cost
  - 8.5.1 Costly Coordination
  - 8.5.2 A Stigmergic Solution
- 232 **8.6** Co-operative Transport
  - 8.6.1 Robots that Push Boxes
  - 8.6.2 Stigmergic Co-operation
- 234 **8.7** Collective Sorting
  - 8.7.1 Spatial Sorting by Ants
  - 8.7.2 Stigmergic Sorting by Robots
- 235 **8.8** Stigmergy and Degrees of Embodiment
  - 8.8.1 Extending the Mind into the World
  - 8.8.2 Degrees of Embodiment

237	<b>8.9</b>	<b>The Lemming</b>	
		8.9.1	Lemming Situation
		8.9.2	Lemming Embodiment
238	<b>8.10</b>	<b>Foraging for Robot Parts and World Parts</b>	
		8.10.1	Robot Parts
		8.10.2	Bricks to Move
239	<b>8.11</b>	<b>Chassis and Rear Wheels</b>	
		8.11.1	NXT Brick as Chassis
240	<b>8.12</b>	<b>Mounting Motors</b>	
		8.12.1	Motors and Cables
240	<b>8.13</b>	<b>Upper Ultrasonic Sensor and Front Wheels</b>	
		8.13.1	The Upper Ultrasonic
		8.13.2	Front Wheel Drive
241	<b>8.14</b>	<b>Mounting the Lower Ultrasonic Sensor</b>	
		8.14.1	Angled Ultrasonics
242	<b>8.15</b>	<b>Designing the Brick Catcher</b>	
		8.15.1	Important Embodiment
243	<b>8.16</b>	<b>Brick Catcher, Brick Processor</b>	
		8.16.1	Embodiment and Situation
244	<b>8.17</b>	<b>Completing the Lemming</b>	
		8.17.1	Final Construction
245	<b>8.18</b>	<b>Level 0: Drive and Calibrate</b>	
		8.18.1	Driving
		8.18.2	Calibration
247	<b>8.19</b>	<b>Level 1: Dodge Obstacles</b>	
		8.19.1	The Lemming's <i>Umwelt</i>
		8.19.2	Avoiding Obstacles
248	<b>8.20</b>	<b>Level 2: Seek Bricks</b>	
		8.20.1	Brick Attraction
		8.20.2	Using the Lower Ultrasonic
249	<b>8.21</b>	<b>Level 3: Process Brick Colours</b>	
		8.21.1	Bricks and Behaviour
250	<b>8.22</b>	<b>Level -1: Integrate Levels to Control Motors</b>	
		8.22.1	Multiple Motor Influences
251	<b>8.23</b>	<b>Putting All the Levels Together</b>	
		8.23.1	The Main Task
253	<b>8.24</b>	<b>The Lonely Lemming</b>	
		8.24.1	Lemming Behaviour
255	<b>8.25</b>	<b>Collective Collecting</b>	
		8.25.1	Two Lemmings
		8.25.2	Three Lemmings
256	<b>8.26</b>	<b>Explaining Sorting Into Corners</b>	
		8.26.1	Corner Analysis
		8.26.2	Corners for Free
259	<b>8.27</b>	<b>Do Lemmings Have Collective Intelligence?</b>	
		8.27.1	"Speed" of Work

## **CHAPTER 9**

### **Totems, Toys — Or Tools?**

- 263 **9.0** Chapter Overview
- 264 **9.1** Are Our Robots More Than Totems?
  - 9.1.1 Uncanny Machines
- 265 **9.2** Are Our Robots More Than Toys?
  - 9.2.1 The Tortoise as Toy
  - 9.2.2 LEGO Is a Toy!
- 267 **9.3** From Totems and Toys to Tools
  - 9.3.1 Tortoise as Tool
  - 9.3.2 Pedagogical and Scientific Tools
- 268 **9.4** Animal Navigation and Representation
  - 9.4.1 Navigational Organisms
  - 9.4.2 Sense–Think–Navigate
- 270 **9.5** Representation and Robot Navigation
  - 9.5.1 Animals to Animats
  - 9.5.2 SLAM and AntiSLAM
- 271 **9.6** Spatial Behaviour and the Reorientation Task
  - 9.6.1 Navigational Cues
  - 9.6.2 The Reorientation Task
- 273 **9.7** Basic Findings with the Reorientation Task
  - 9.7.1 Rotational Error
  - 9.7.2 Mandatory Geometry
- 275 **9.8** Representational Theories of Reorientation
  - 9.8.1 The Geometric Module
  - 9.8.2 Geometry and Representation
- 277 **9.9** Whither the Geometric Module?
  - 9.9.1 Modifying Modularity
  - 9.9.2 Non-modular Reorientation
- 278 **9.10** Reactive Robots and Their Evolution
  - 9.10.1 New Wave Robotics
  - 9.10.2 Evolving Robots
- 280 **9.11** Reactive Robots and Rotational Errors
  - 9.11.1 Reactive Reorientation
  - 9.11.2 Representative Reaction
- 282 **9.12** Reorienting LEGO Robots
  - 9.12.1 Motivating AntiSLAM
  - 9.12.2 Ultrasonic Sensors
- 283 **9.13** AntiSLAM Overview
  - 9.13.1 Modifying Vehicle 2

284	<b>9.14</b>	<b>From Vehicle 2 Onward</b>	
		9.14.1 Foraging for Parts	
285	<b>9.15</b>	<b>A Spine for AntiSLAM</b>	
		9.15.1 Creating a Chassis	
286	<b>9.16</b>	<b>Structure from Motors</b>	
		9.16.1 Motors and Axles	
286	<b>9.17</b>	<b>Sensor Supports and Front Wheels</b>	
		9.17.1 Creating Sensor Supports	
		9.17.2 Front Wheels	
288	<b>9.18</b>	<b>Sensor Arrays</b>	
		9.18.1 Mounting Sensors	
289	<b>9.19</b>	<b>AntiSLAM's Rear Wheels and Cables</b>	
		9.19.1 Rear Wheels	
		9.19.2 Connecting Cables	
290	<b>9.20</b>	<b>AntiSLAM Level 0: Drive</b>	
		9.20.1 Subsumption Architecture	
291	<b>9.21</b>	<b>Level 1: Escape</b>	
		9.21.1 Importance of Escaping	
292	<b>9.22</b>	<b>Level 2: Following Walls</b>	
		9.22.1 Biasing Lower-level Behaviour	
293	<b>9.23</b>	<b>Level 3: Using Light as a Local Feature</b>	
		9.23.1 Local Feature Sensitivity	
295	<b>9.24</b>	<b>Level -1: Determining Motor Speeds</b>	
		9.24.1 Finally, Level -1	
295	<b>9.25</b>	<b>The Main Task</b>	
		9.25.1 Putting It Together	
297	<b>9.26</b>	<b>Primitive Behaviours</b>	
		9.26.1 Levels -1 + 0	
		9.26.2 Levels -1 + 0 + 1	
298	<b>9.27</b>	<b>Bias and Reorientation</b>	
		9.27.1 Levels -1 + 0 + 1 + 2	
		9.27.2 Rotational Error and AntiSLAM	
300	<b>9.28</b>	<b>Beyond Rotational Error</b>	
		9.28.1 Nolfi and Beyond	
		9.28.2 Feature Sensitivity	
302	<b>9.29</b>	<b>Moving the Local Feature</b>	
		9.29.1 Moving the Light	
304	<b>9.30</b>	<b>All Levels with No Local Feature</b>	
		9.30.1 Turning Lights Off	
305	<b>9.31</b>	<b>Reorienting Reorientation</b>	
		9.31.1 Building a Better Mouse	
		9.31.2 Different Views of Reorientation	
307	<b>9.32</b>	<b>Hard Fun and Hard Science</b>	
		9.32.1 Hard Fun	
		9.32.2 Hard Science
